

Datasheet

Enrich Your Applications with Noise-free, Structured and Machine-readable News Feed APIs

Contify aggregates, deduplicates and tags company information into a steady stream of machine-readable business and industry-relevant news, delivered through RESTful APIs, Webhooks and RSS feeds.

Aggregation

Exhaustive Coverage

Instead of a keyword-based feed that pulls in all manner of information, Contify provides a clean, company-based intelligence feed with only business and industry-relevant information.

Robust Sourcing Engine

Information is aggregated from over 200,000 sources including online news, company websites, premium and niche publications, social media, regulatory portals, review websites, job boards, etc.

Custom Sourcing

Contify delivers actionable intelligence using a hybrid system of machine learning and contextual noise-filtering algorithms, augmented by a layer of human curation.

Multi-Language Support with SmartTranslate

We work with you extensively to categorize and structure the sourced updates in a manner consistent with your specific business goals and reporting requirements.

Powered by our AI-Enabled Market and Competitive Intelligence Platform

Instead of a keyword-based feed that pulls in all manner of information, Contify provides a clean, company-based intelligence feed with only business and industry-relevant updates.

Contextual Noise-Filtering Algorithms

Our proprietary NER, NLP, deduplication and disambiguation algorithms ensure a steady stream of squeaky-clean, structured and machine-readable updates.

Augmented by Human Curation

Our hybrid approach fuses machine learning with a layer of human analysts who extract insights, identify trends, and ensure system integrity and comprehensive coverage.

Customised Taxonomy and API Endpoints

We work with you extensively to structure the sourced information and their endpoints to match your unique business goals.

Clean, Enriched and Ready to Consume

RESTful APIs

Our RESTful APIs deliver structured intelligence in JSON format with fully-customisable endpoints.

Webhooks

Leverage the power of Webhooks with updates pushed to your application servers in real-time, and save on computing resources in the process.

RSS

News Feed from Contify are also delivered as structured, machine-readable RSS feeds.

Endpoints

What you get

- 1. Headline**
The title of the news story, social post, blog article or press release.
- 3. Entity name**
The company about whom the news article, blog article or press release was written.
- 5. Source and dateline**
The date the update was published along with the name of the publisher.

- 2. Summary**
The leading paragraph of the news story, blog article or press release.
- 4. Entity logo**
A 1x1 thumbnail image of the company's logo in a PNG or JPEG format.
- 6. Custom tags and taxonomy**
Updates are tagged according to a fully customisable taxonomy — **topics, content type, location, and source language.**

Use cases

Enrich Your Application,
Empower Your Teams and Users
